

# Danfoss Climate Solutions Your partner for overall efficiency

Smart Heating Croatia 2021 - Danish Croatian District Heating Days 22-24 September 2021

Samir Džomba Velimir Nastasić Josip Vilus Amer Karabegović

# Four **business segments** geared for growth

# **Danfoss Power Solutions**

#2 Market position

- 7,826 employees
- 28 factories in 12 countries
- 2.2bn EUR annual sales

#### **Danfoss Cooling**

#2 Market position

- 6,108 employees
- 15 factories in 10 countries
- 1.7bn EUR annual sales

#### **Danfoss Heating**

#1 Market position

- 4,684 employees
- 24 factories in 11 countries
- 0.9bn EUR annual sales

#### **Danfoss Drives**

#2 Market position

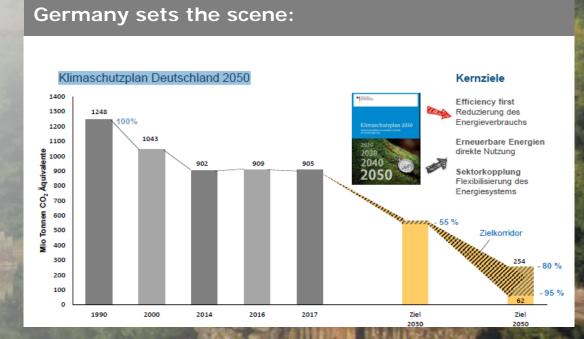

- 4,504 employees
- 10 factories in 7 countries
- 1.5bn EUR annual sales

# What drives all of us?

- 1. Energy efficiency and business excellence in all segments of business and work
- 2. CO2 coupons and increase in OPEX (currently 60 EUR/ton, will go up to 100 EUR/ton)
- 3. Introduction of more RES and Integration of electricity, heat, gas and transport sectors
- 4. Recovery and resilience
- 5. Strong end-user role

#### Key targets:

- Efficiency first
- Reduce energy consumption
- Renewable Energies
- Further deployment direct use
- Sector Coupling
- Flexibility for energy system

#### **ΔT Optimization**

Economical balance between temperature and flow

# Main Challenges in District Energy

Peak energy demand

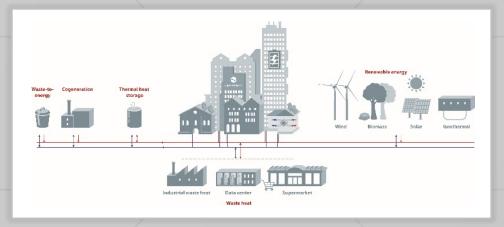

Drives up overall cost (OPEX as well CAPEX)

#### **Optimal Network Design**

With new connections and new buildings

#### **Legacy SCADA**

Make data integration difficult and time consuming

#### Increase focus on Business models

Create attractive busines environment for future

#### Decentralization increasd energy source complexity

In production: more heat sources including renewables

#### **Decarbonization**

Legislation and environmental care / energy efficiency

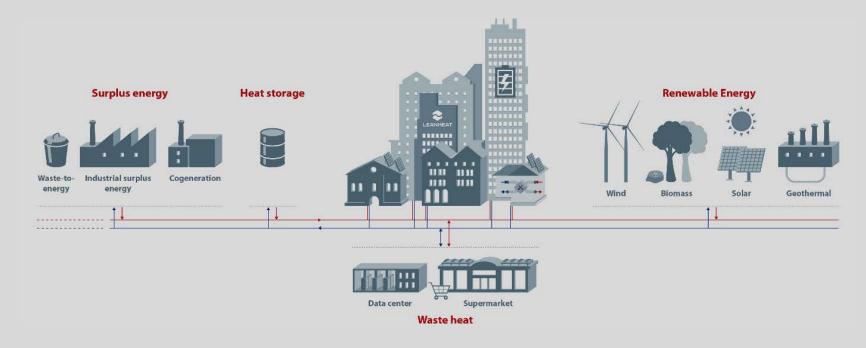

Secure high efficiency of operation and coverage of customer needs by providing undisturbed district energy distribution (or service), also in most demanding and unexpected conditions.

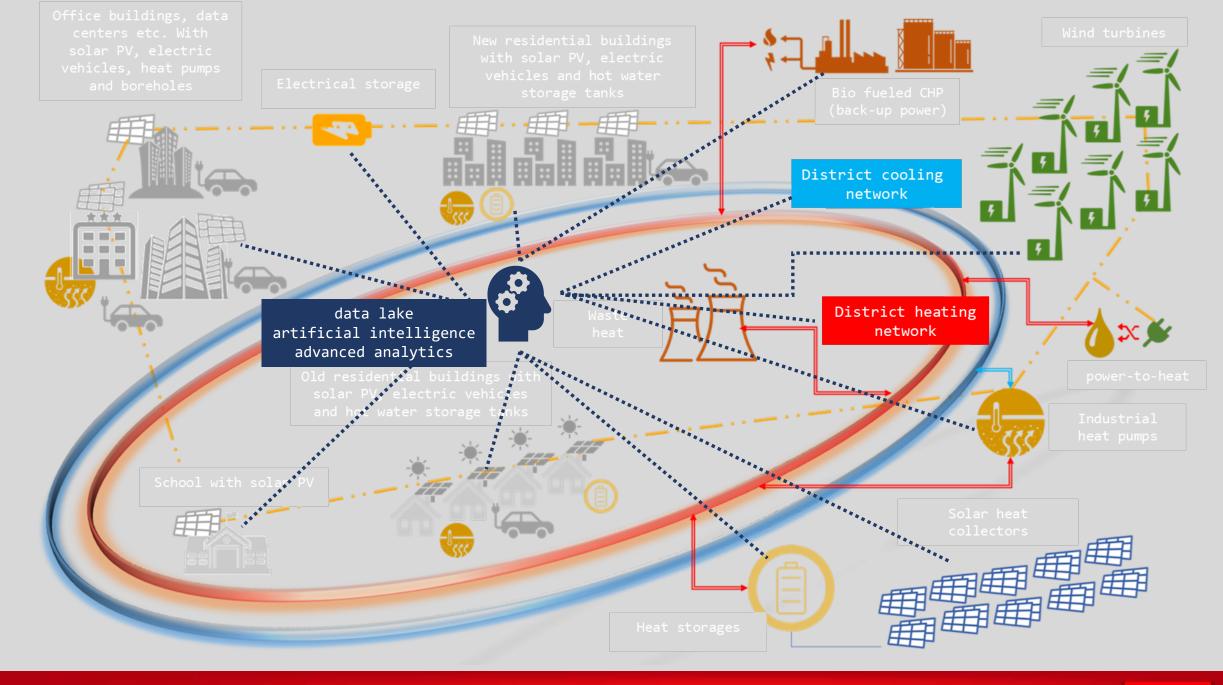

# Our definition of a state-of-the-art: District Energy system

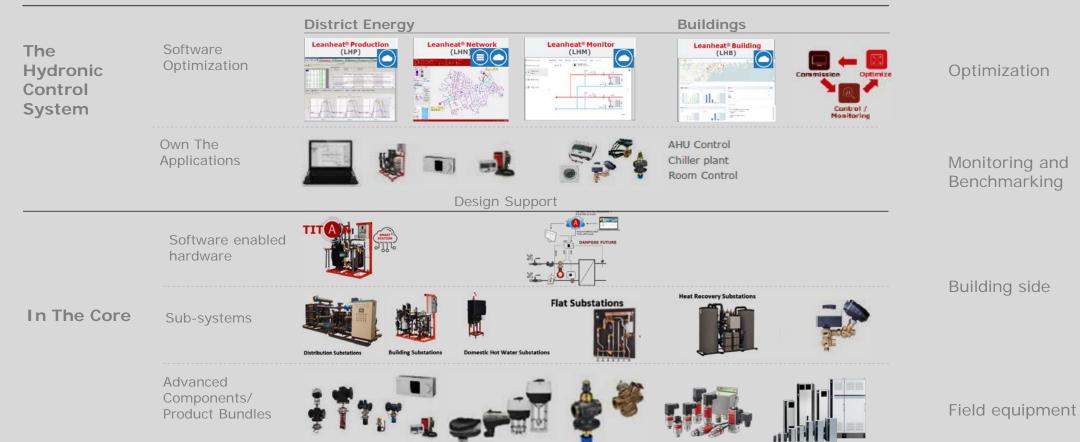

- From single source to multisource
- From fossil to renewables & surplus energy
- From high temperature to low temperature
- From one-way to bidirectional
- Positive **regulatory trends** across the globe
- Changing customer structure & increased investments (Engie, Veolia, Fortum,...)

How, in what way and with the help of which technologies to respond to challenges?

#### **Danfoss has a SOLUTION!**

End to end, technological solutions from the necessary equipment in the field (from production to final consumption) to advanced software solutions (data aggregation, advanced analytics, optimization, and again from production to final consumption).

#### Danfoss Leanheat®

Full end-to-end energy optimization solutions

### Production

## **Distribution** Monitoring

#### **Demand**

#### **Users**

Load Forecasting

Statistic Supply temperature optimization

Production optimization

Production planning

#### Network

Network Design

On line visualization of network operation

> Hydraulic Supply temperature optimization

Pressure optimization

#### **Monitor**

Monitoring and Control

Easy data integration

Easy data extraction and interpretation

Integrate devices with different protocols

# **Building**

Peak load optimization

Energy optimization

#### **Apartments**

Customer engagement

Return temperature optimization

#### Data API HUB

Al Engine 🕾

#### **Primary Side**

(Planning, Network operation, Production)

**Secondary Side** 

(Buildings)

Danfoss Drives the best global expert in drives business presents: VLT® AQUA Drive FC 202-the best choice for pump applications in district heating solutions

Nothing beats know how and experience

Built on a solid foundation of know-how and experience, combined with Danfoss quality and a global network of local 24/7 service

- Freedom to combine the favored motor technology with the perfect match for all W&WW, district heating and similar applications
  - The combination of the three pillars
    - Energy savings
    - Reduced installation costs and
    - Solid dedication to all water applications lead to a unique performance

Classified as Business

30%
cost reduction in
1st year compared

alternative

#### Product range

| ■ 1 x 200 – 240 V AC: 1.1 – 22 kW   |
|-------------------------------------|
| ■ 1 x 380 – 480 V AC: 7.5 – 37 kW   |
| ■ 3 x 200 – 240 V AC:0.25 – 45 kW   |
| ■ 3 x 380 – 480 V AC:0.37 – 1000 kW |
| ■ 3 x 525 – 600 V AC:0.75 – 90 kW   |
| • 3 x 525 – 690 V AC:11 – 1400 kW*  |

<sup>\*</sup>Up to 2000 kW available on request
