Danfoss - Engineering the dreams of tomorrow – today

Danfoss is a world-leading supplier of technologies for several industries. We employ 24.000 people and serve customers in more than 100 countries. Danfoss engineers technologies that enable the world of tomorrow to do more with less. We play an active role in the main growth themes in a world that is rapidly changing: infrastructure, food, energy and climate are the focus of our business. Cities for millions that touch the sky. A richer harvest to feed a growing world. Keeping food fresh and our children warm in a world that can make more out of less. This is how we are Engineering Tomorrow.

Our mindset dates back to 1933, when Mads Clausen founded Danfoss in Nordborg, Denmark. Since then, the business has grown from a solo enterprise into one of the world's leading suppliers of energy-efficient and innovative solutions.

Making a Smart City for – and together with – the people, proving that not only big cities can benefit from the Smart City approach

In Egedal Municipality we are exploiting the new digital solutions to achieve effective and sustainable service for both inhabitants and business community. One of our top projects is our 'Smart City test area', where we register movement patterns in the city centre. This information is used to ensure safe traffic around the school area, better connections for the commuters and in general improve the city planning, so it meets the actual needs. Furthermore we are focusing on sustainable construction. Besides renovating our own buildings with focus on sustainability and energy efficiency, we have made changes in our urban development plan assuring that all new buildings live up to our requirements.

Integrating citizens and local business community into a green smart city

In Fredensborg municipality innovative thinking and sustainability beneficial for the inhabitants are top priority. The municipality consist of four towns, several villages and a large rural area and we are therefore working with smart solutions, urban planning and energy efficiency in many different surroundings. One of our main goals has been adjusting the whole municipality to the climate changes while creating beautiful and creative spaces for many different activities. One of our climate change projects, the 'Climate adjustment Kokkedal' even won the Climate Awards 2017. Furthermore we are working with the infrastructure of our towns, making sure, that both inhabitants and visitors experience as much as possible, when visiting us.

Driving change to defeat diabetes and other serious chronic conditions

In 1923, our Danish founders began a journey to change diabetes. Today, we are thousands of employees across the world with the passion, skills and commitment to drive change to defeat diabetes and other serious chronic diseases.

We have more than 90 years of innovation and leadership in diabetes care. This heritage has given us experience and capabilities that also enable us to help people defeat other serious chronic conditions: haemophilia, growth disorders and obesity.

Denmark's largest cooperatively-owned energy and fibre-optic group

SEAS-NVE is cooperatively owned – 390,851 members each own a share of our common energy and fibre-optic group. At SEAS-NVE we uphold the interests of our cooperative members and customers when we invest in wind turbines, innovate for the future and advice on energy; when we roll out fibre-optic broadband, renovate street lighting and implement innovative smart city solutions. We want to make a marked difference to our 560,000 energy customers and 118,000 fibre customers – comprising private consumers, businesses and public-sector customers. Therefore, we deliver products at competitive prices, which bring value to everyday life. With green investments, we work determinedly at promoting a sustainable and digital future. Together. For the benefit of our cooperative members and customers.
