MEET THE FUTURE

POWERED BY HRVATSKI TELEKOM

T...

SMART CITIES SOLUTION

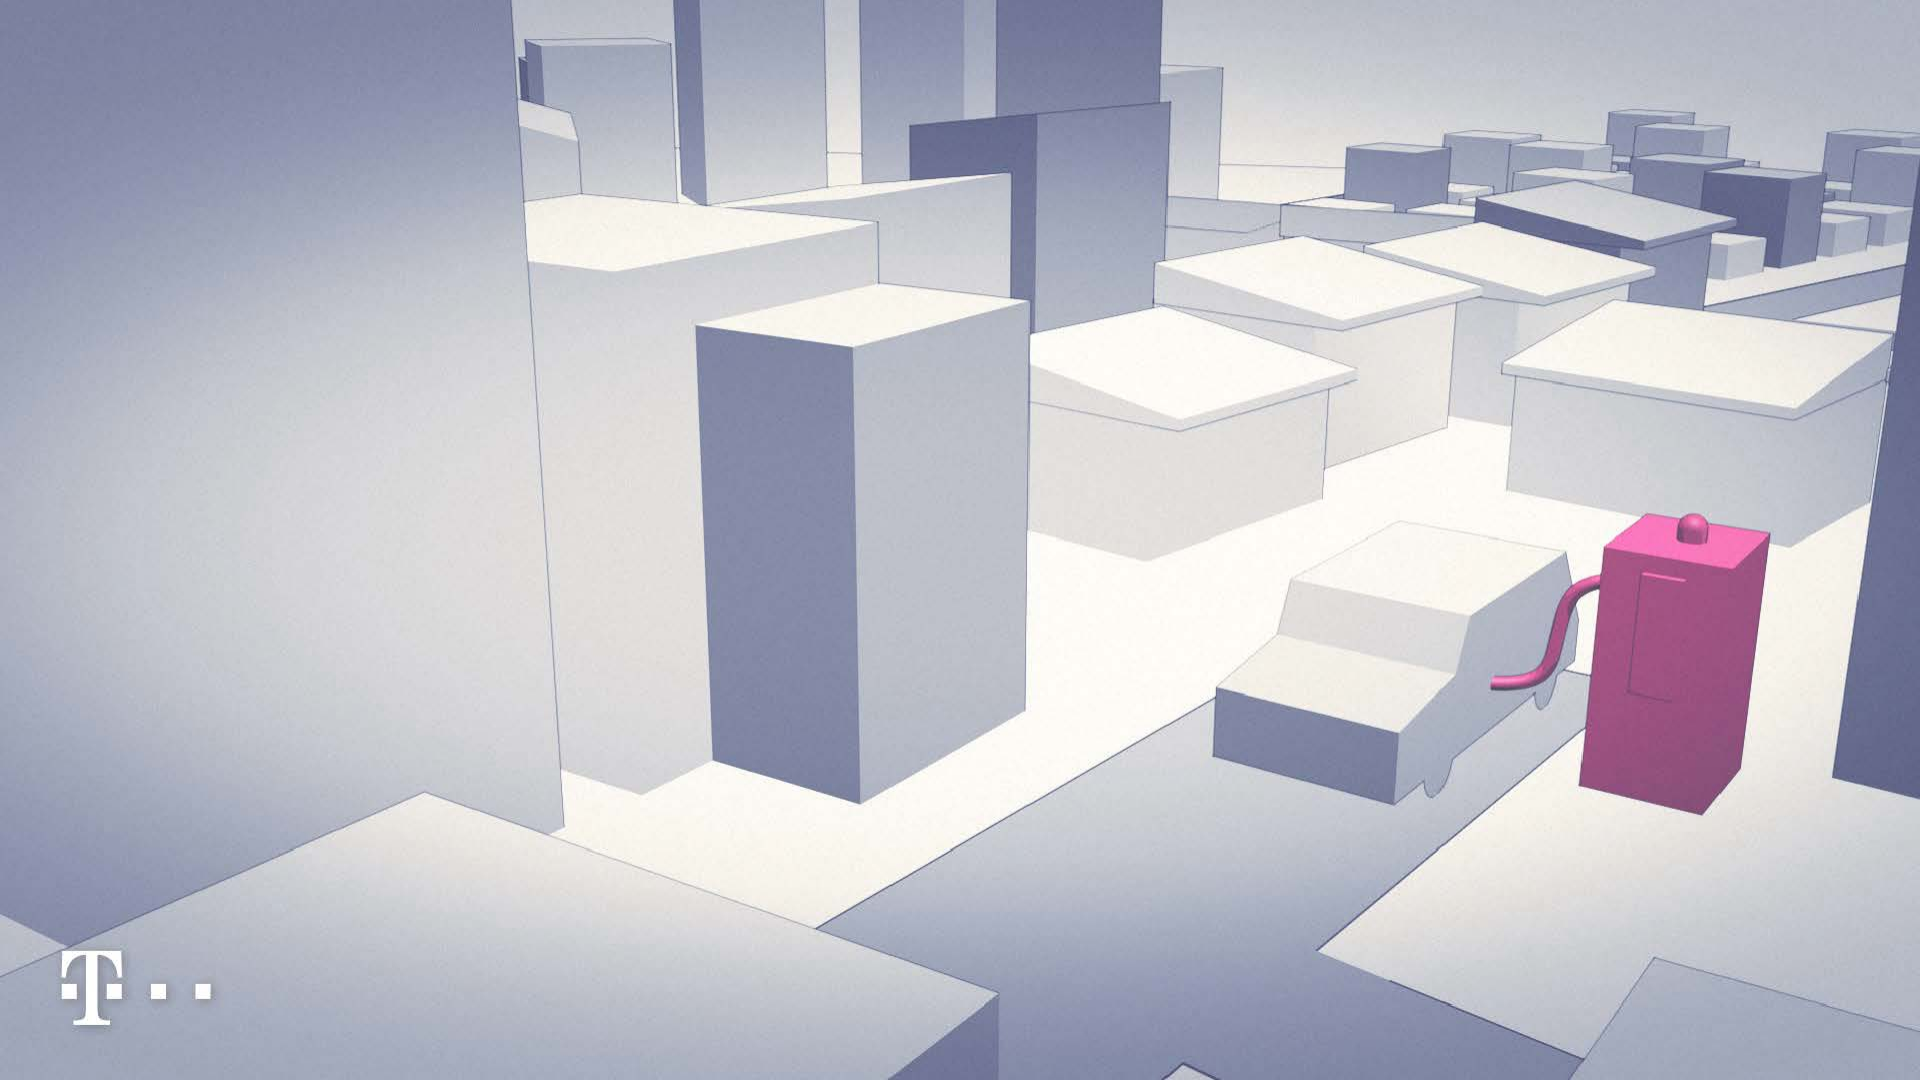

T...

WI-FI

Public internet
connectivity as a
basis for smart cities

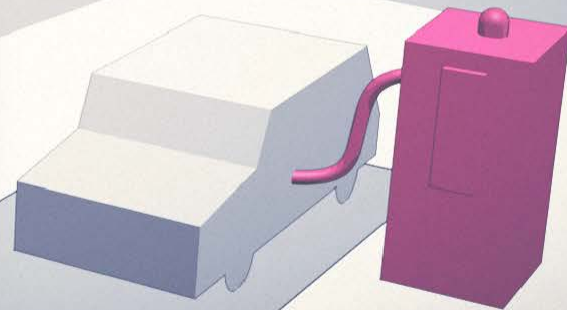

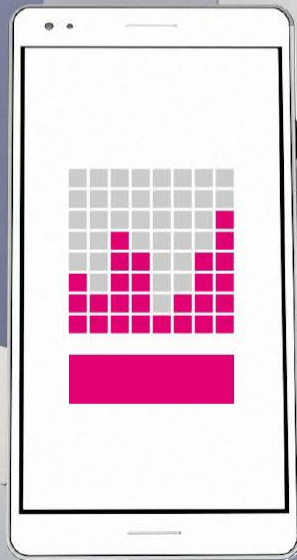

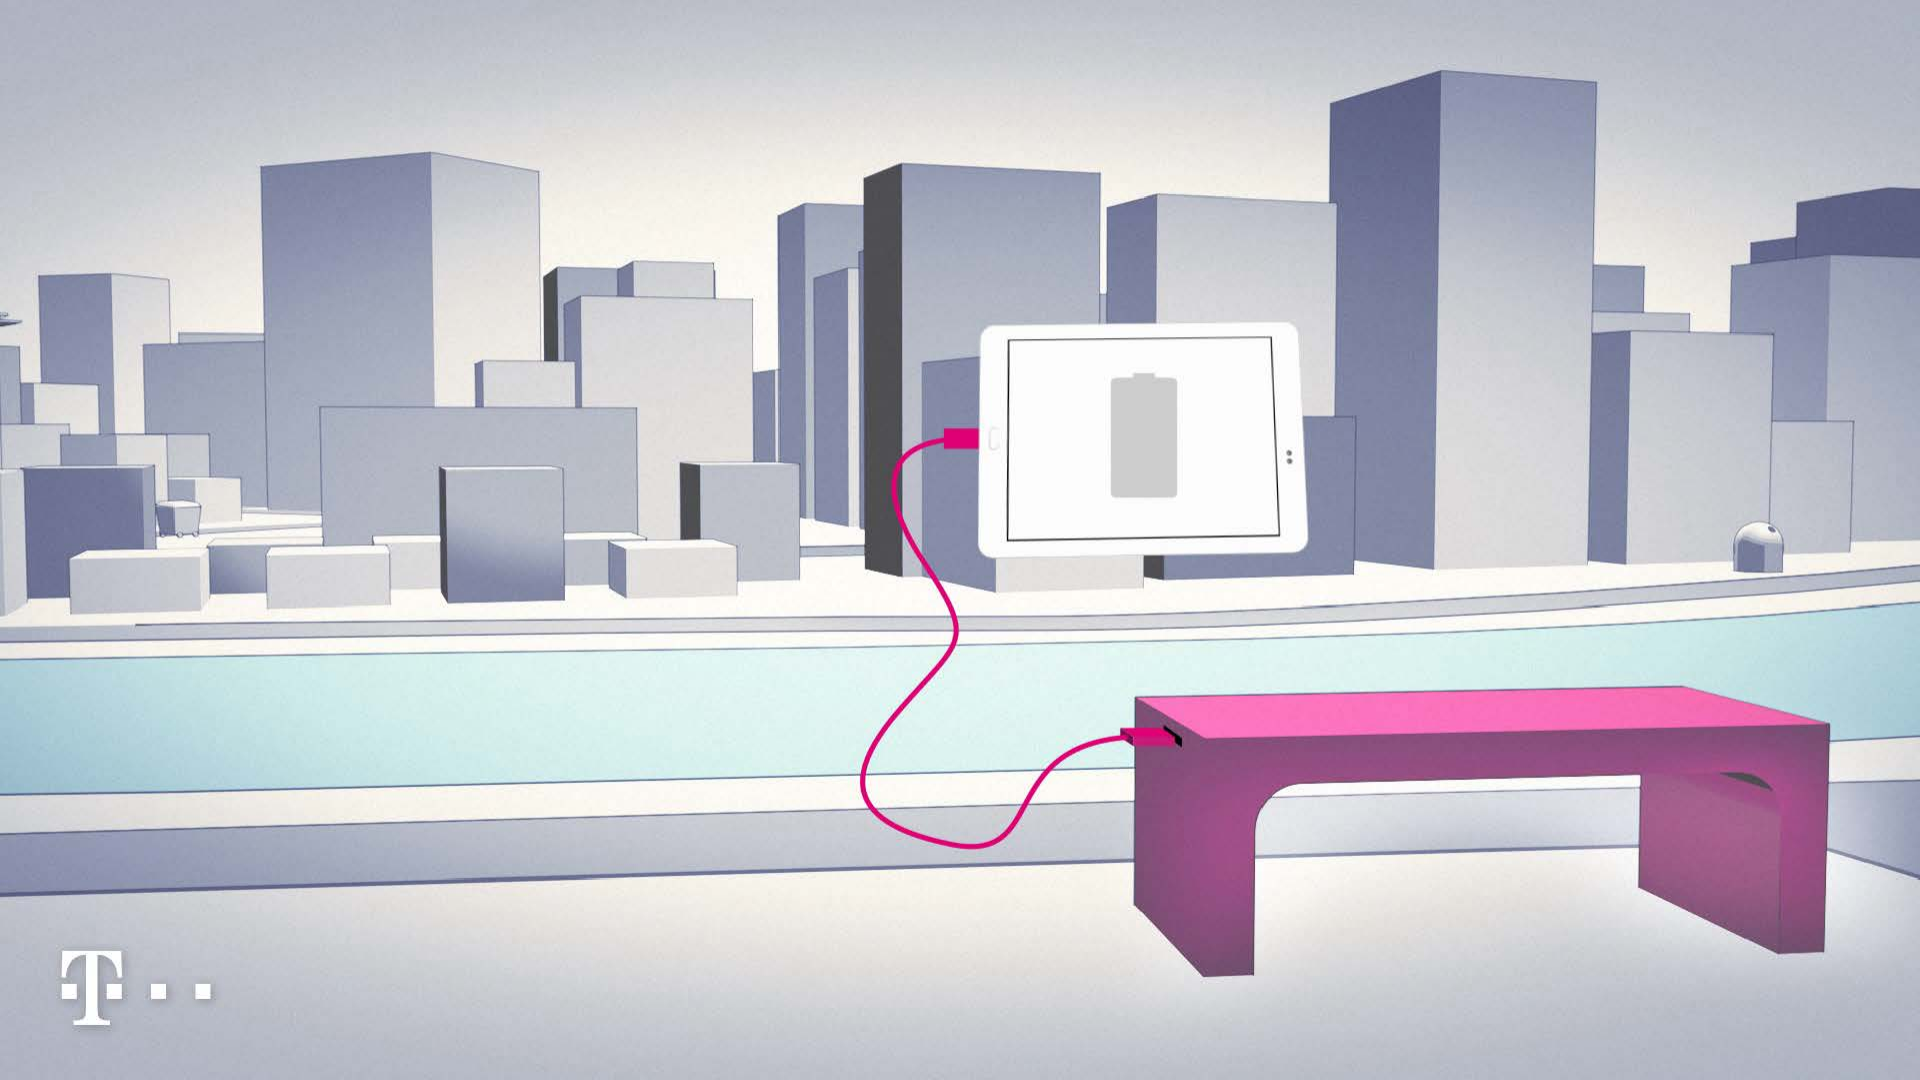

T...

E-MOBILITY

EV charging infrastructure combined with driver based software to find, book and pay for EV charging

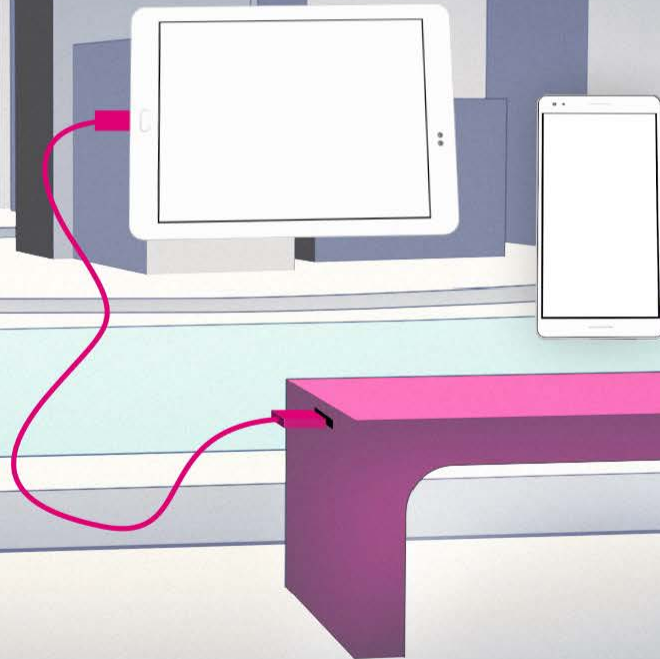

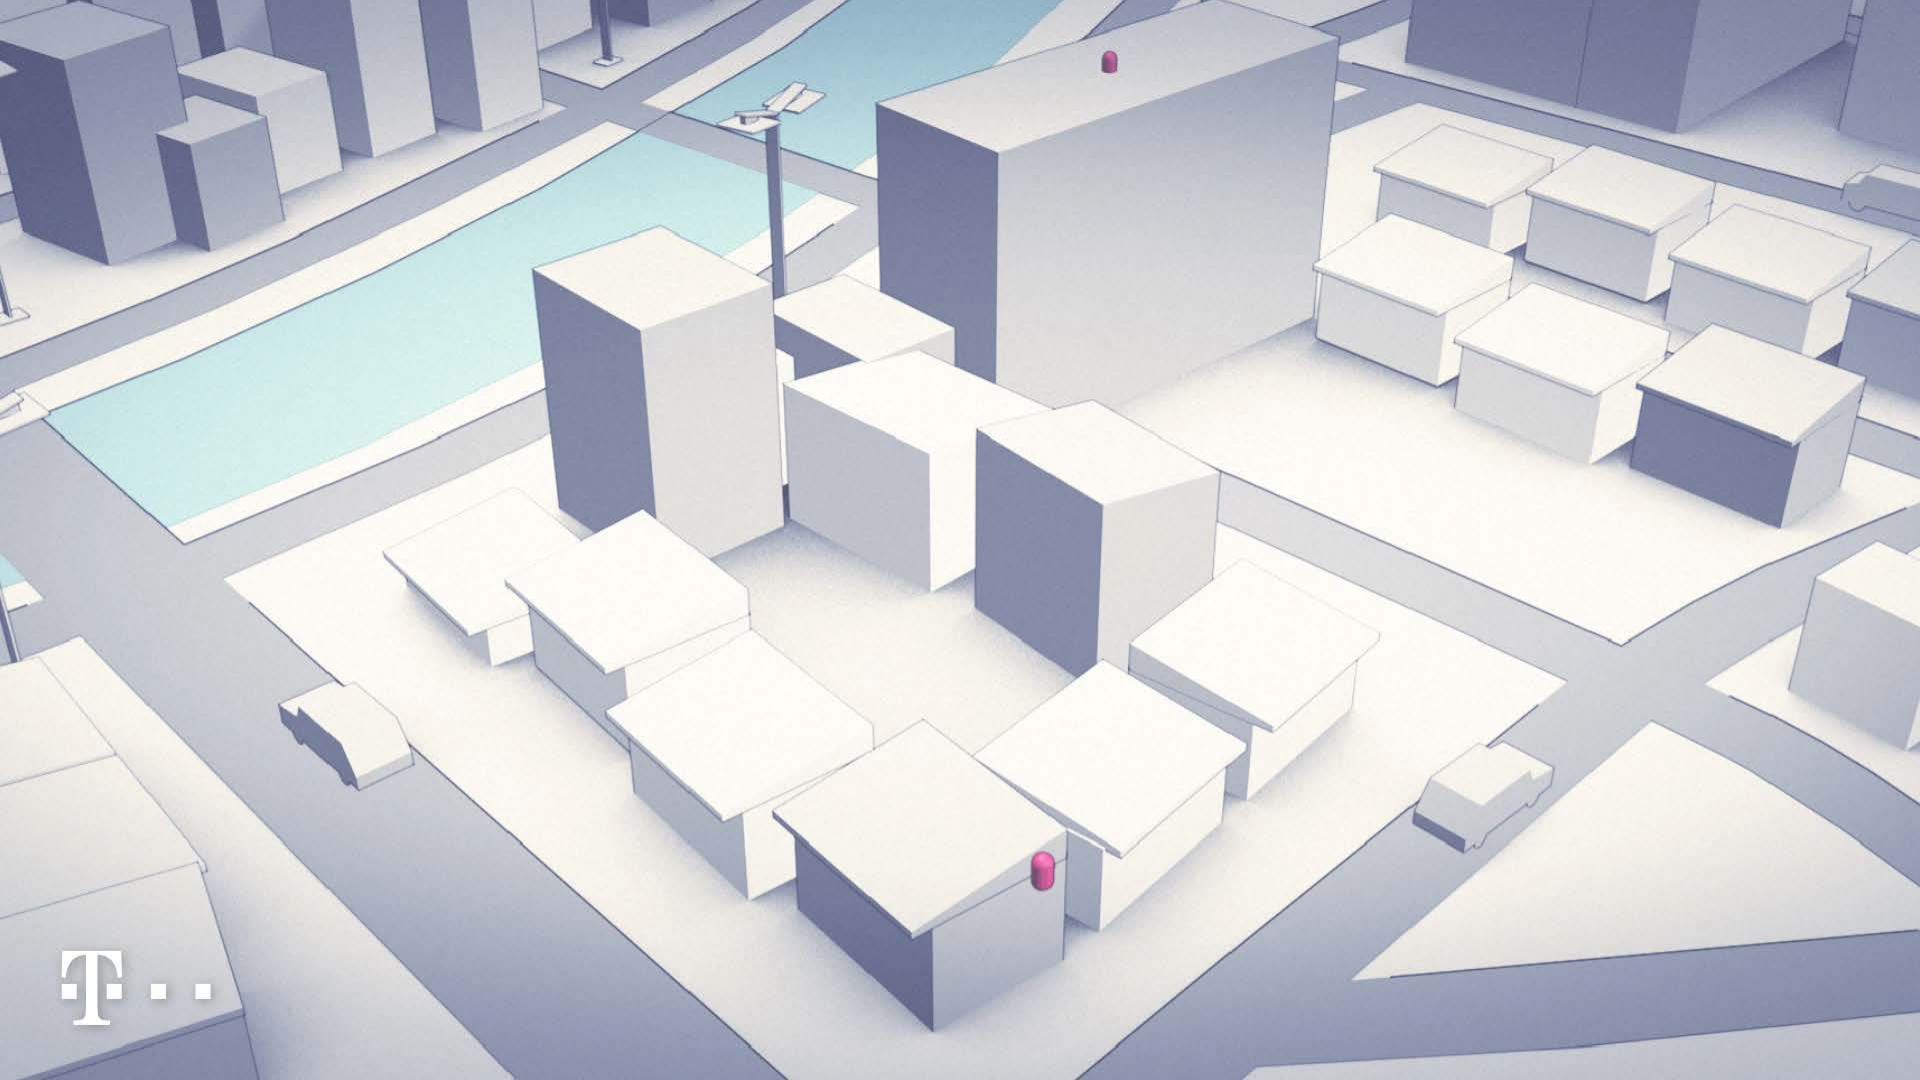

T...

SMART BENCH

Smart urban infrastructure
powered by solar energy
charges devices

T...

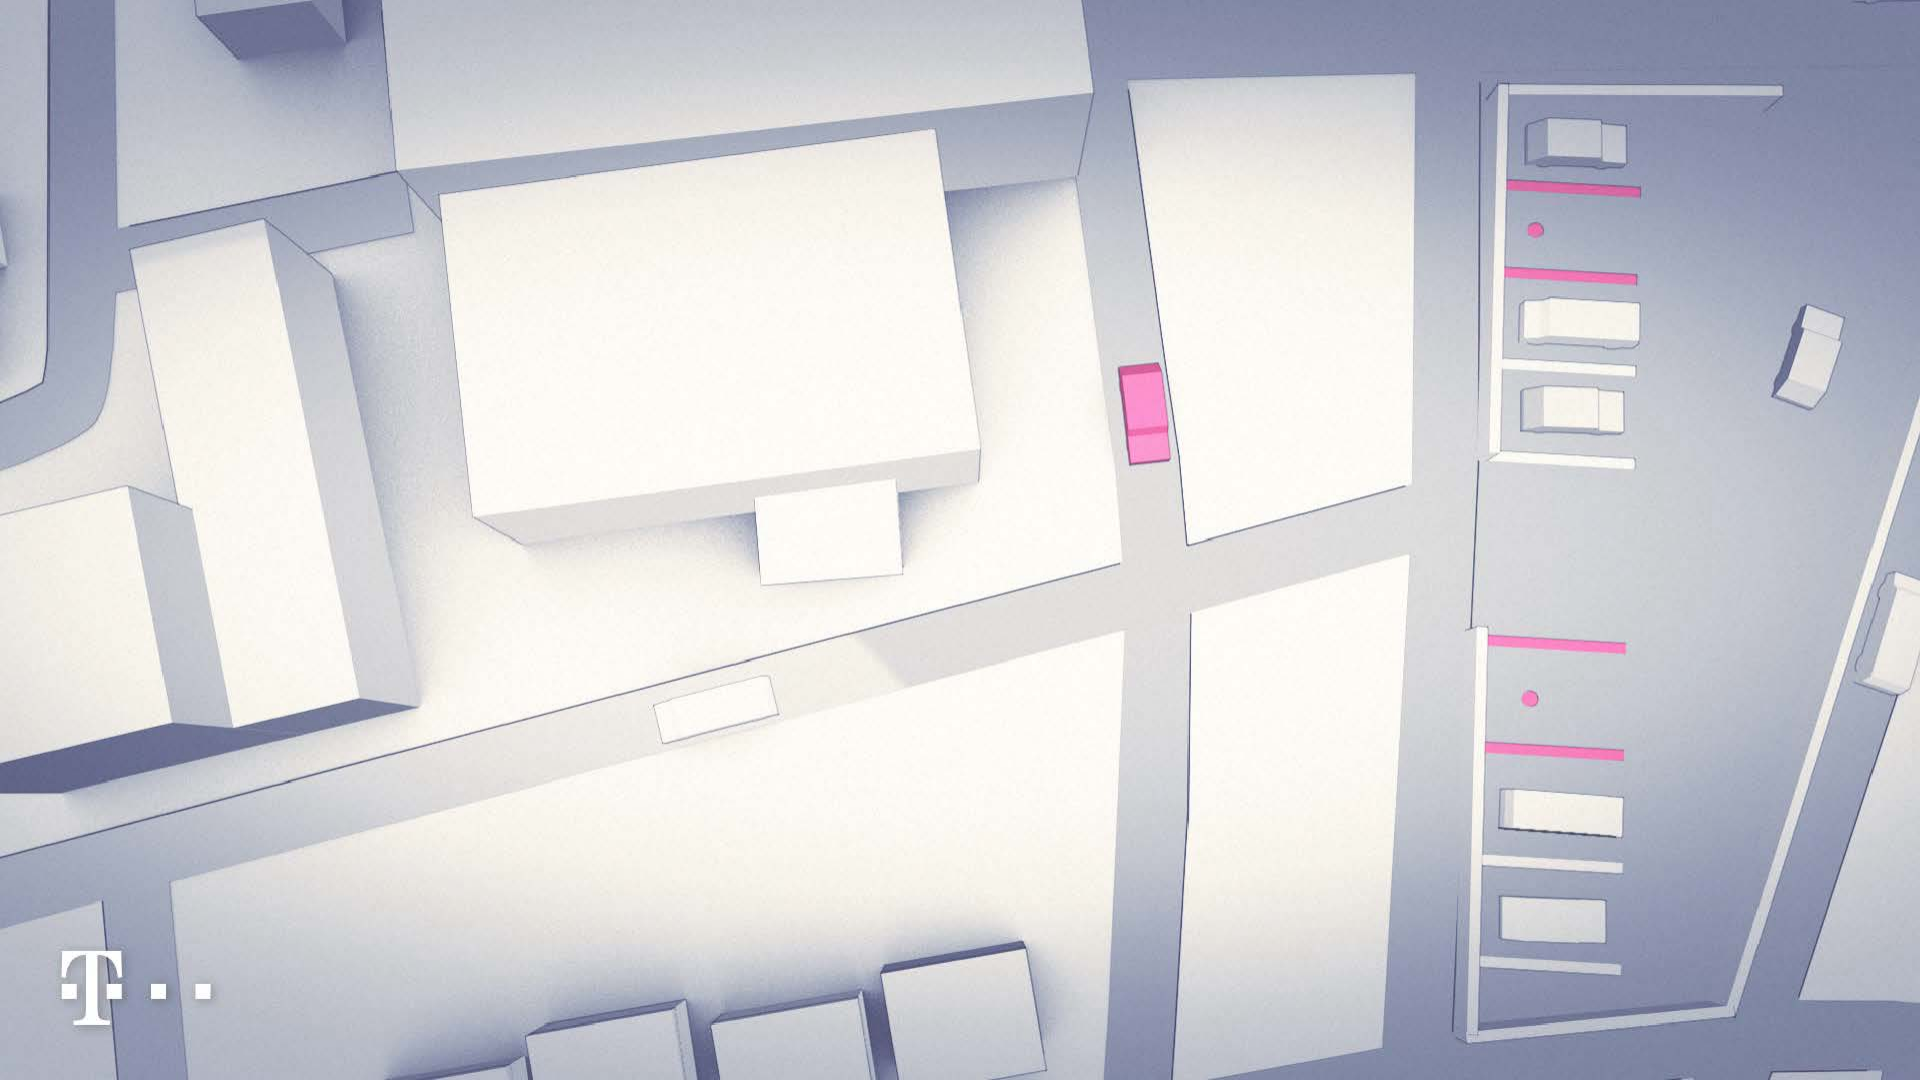

AIR QUALITY

Increased visibility and awareness of the root causes of pollution in your city, with real-time insights

T...

T...

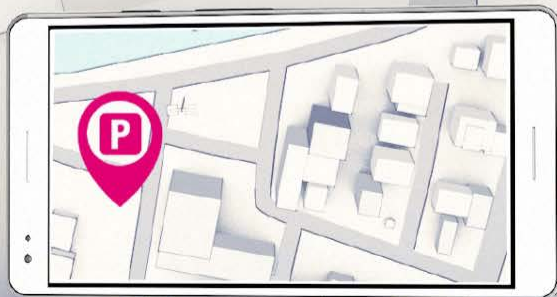

T..

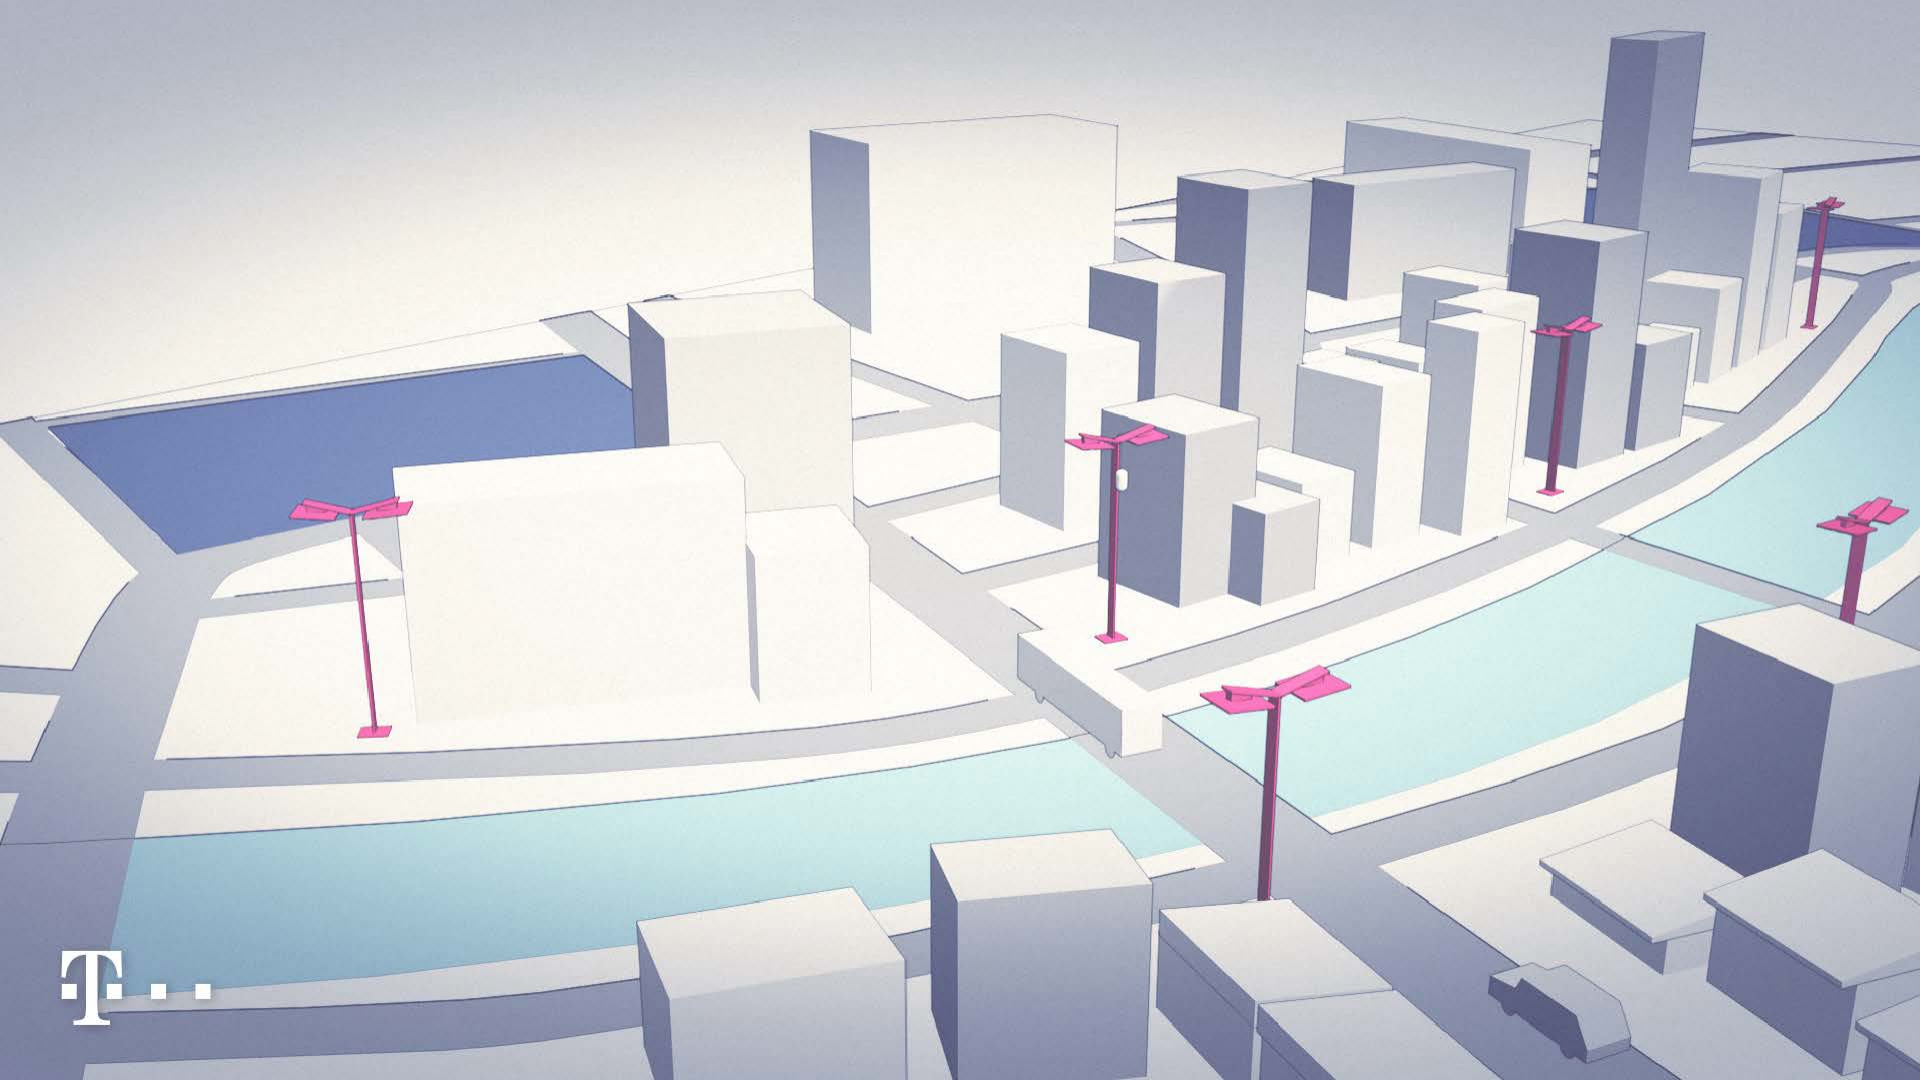

SMART PARKING

Parking space
monitoring by
in-ground sensors

T...

T...

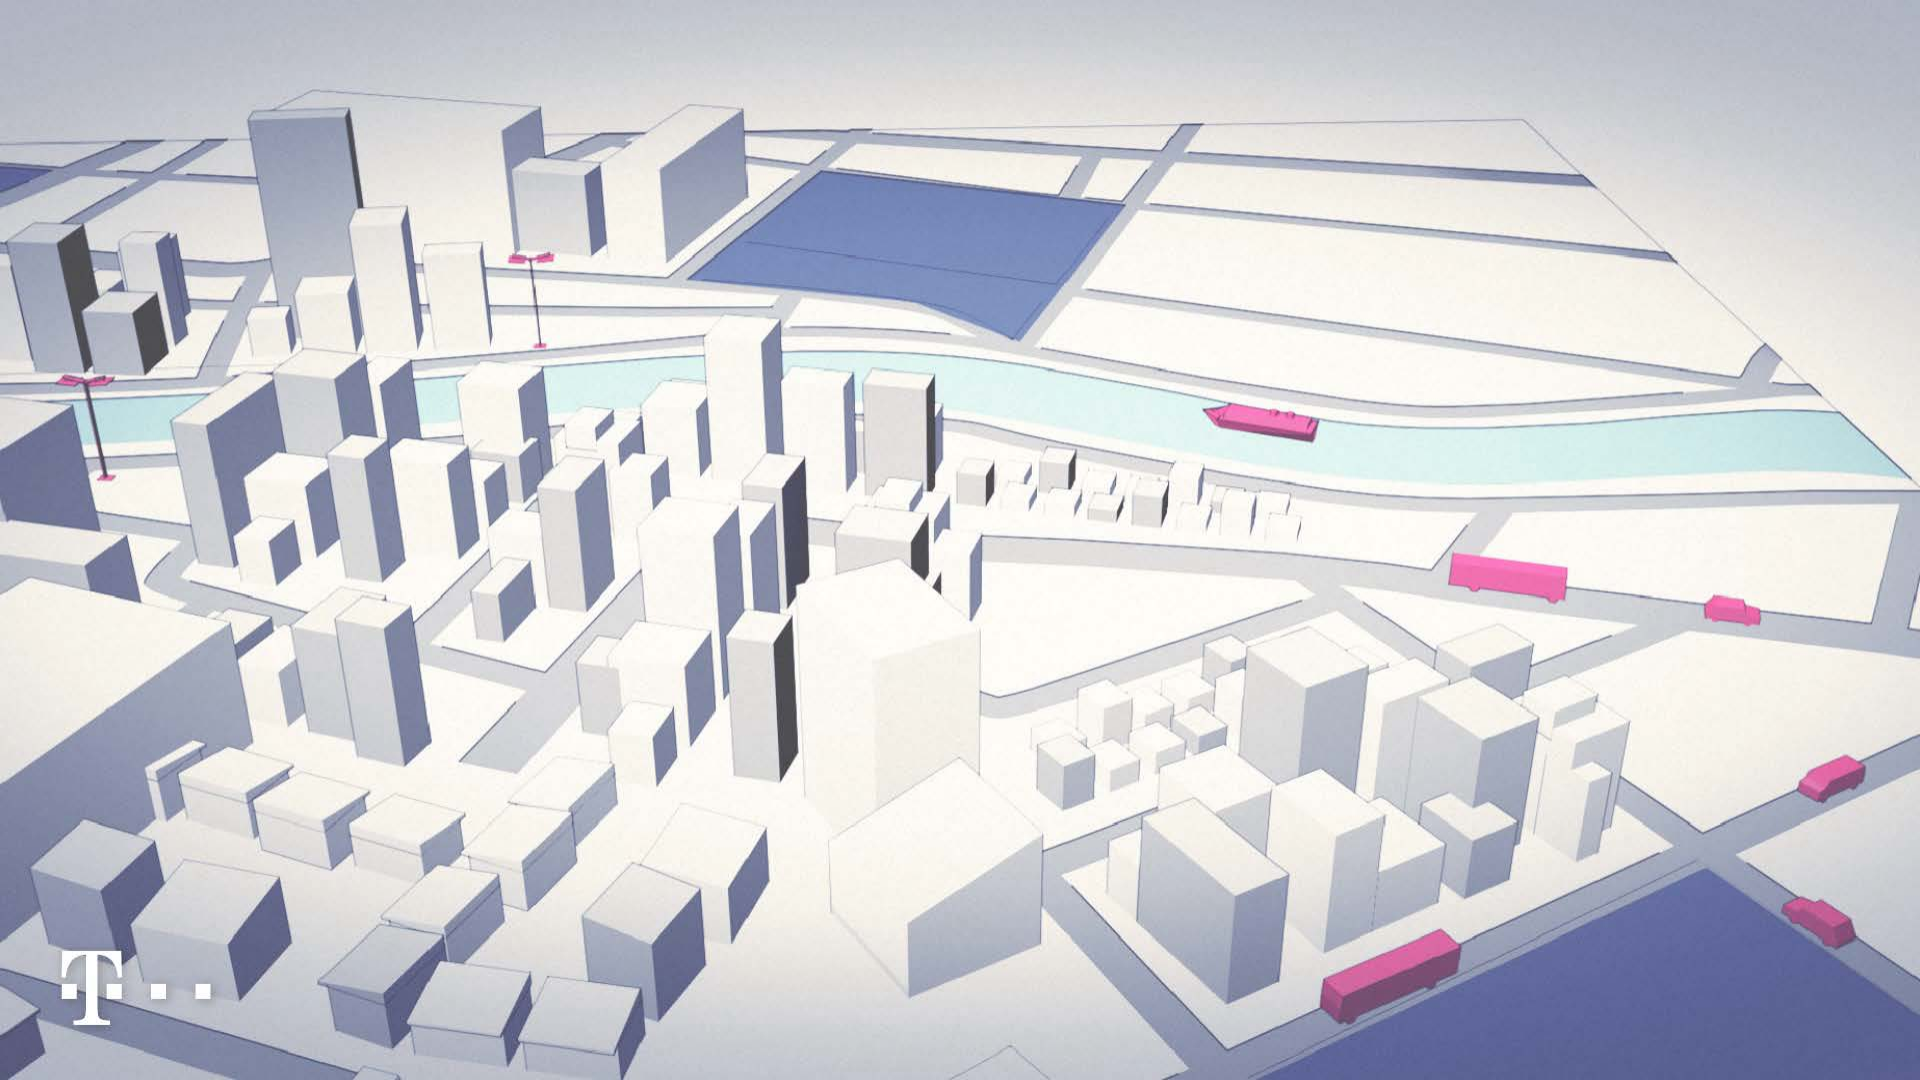

T...

SMART LIGHTNING

Enables remote control
of all connected
street lights

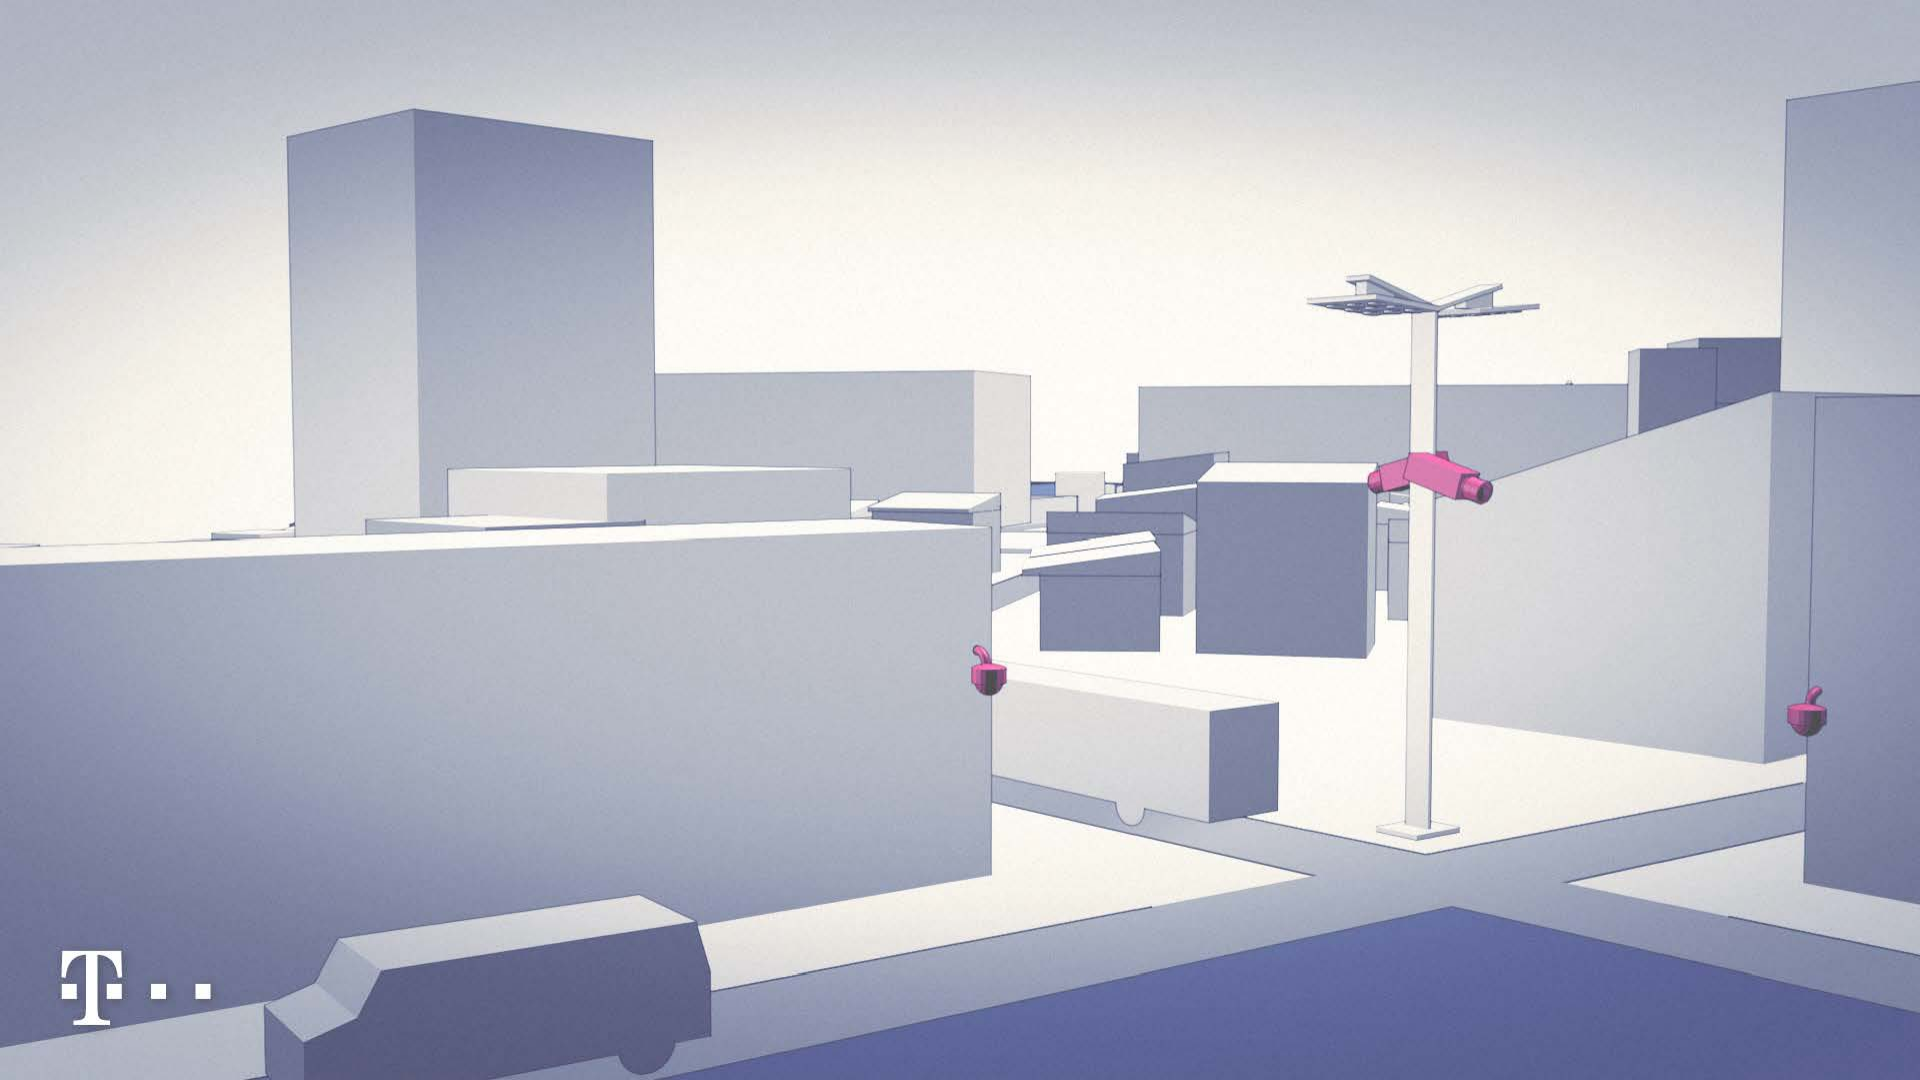

T...

FLEET MANAGEMENT

Improving efficiency,
productivity and reducing
transportation and staff
costs through route
optimization

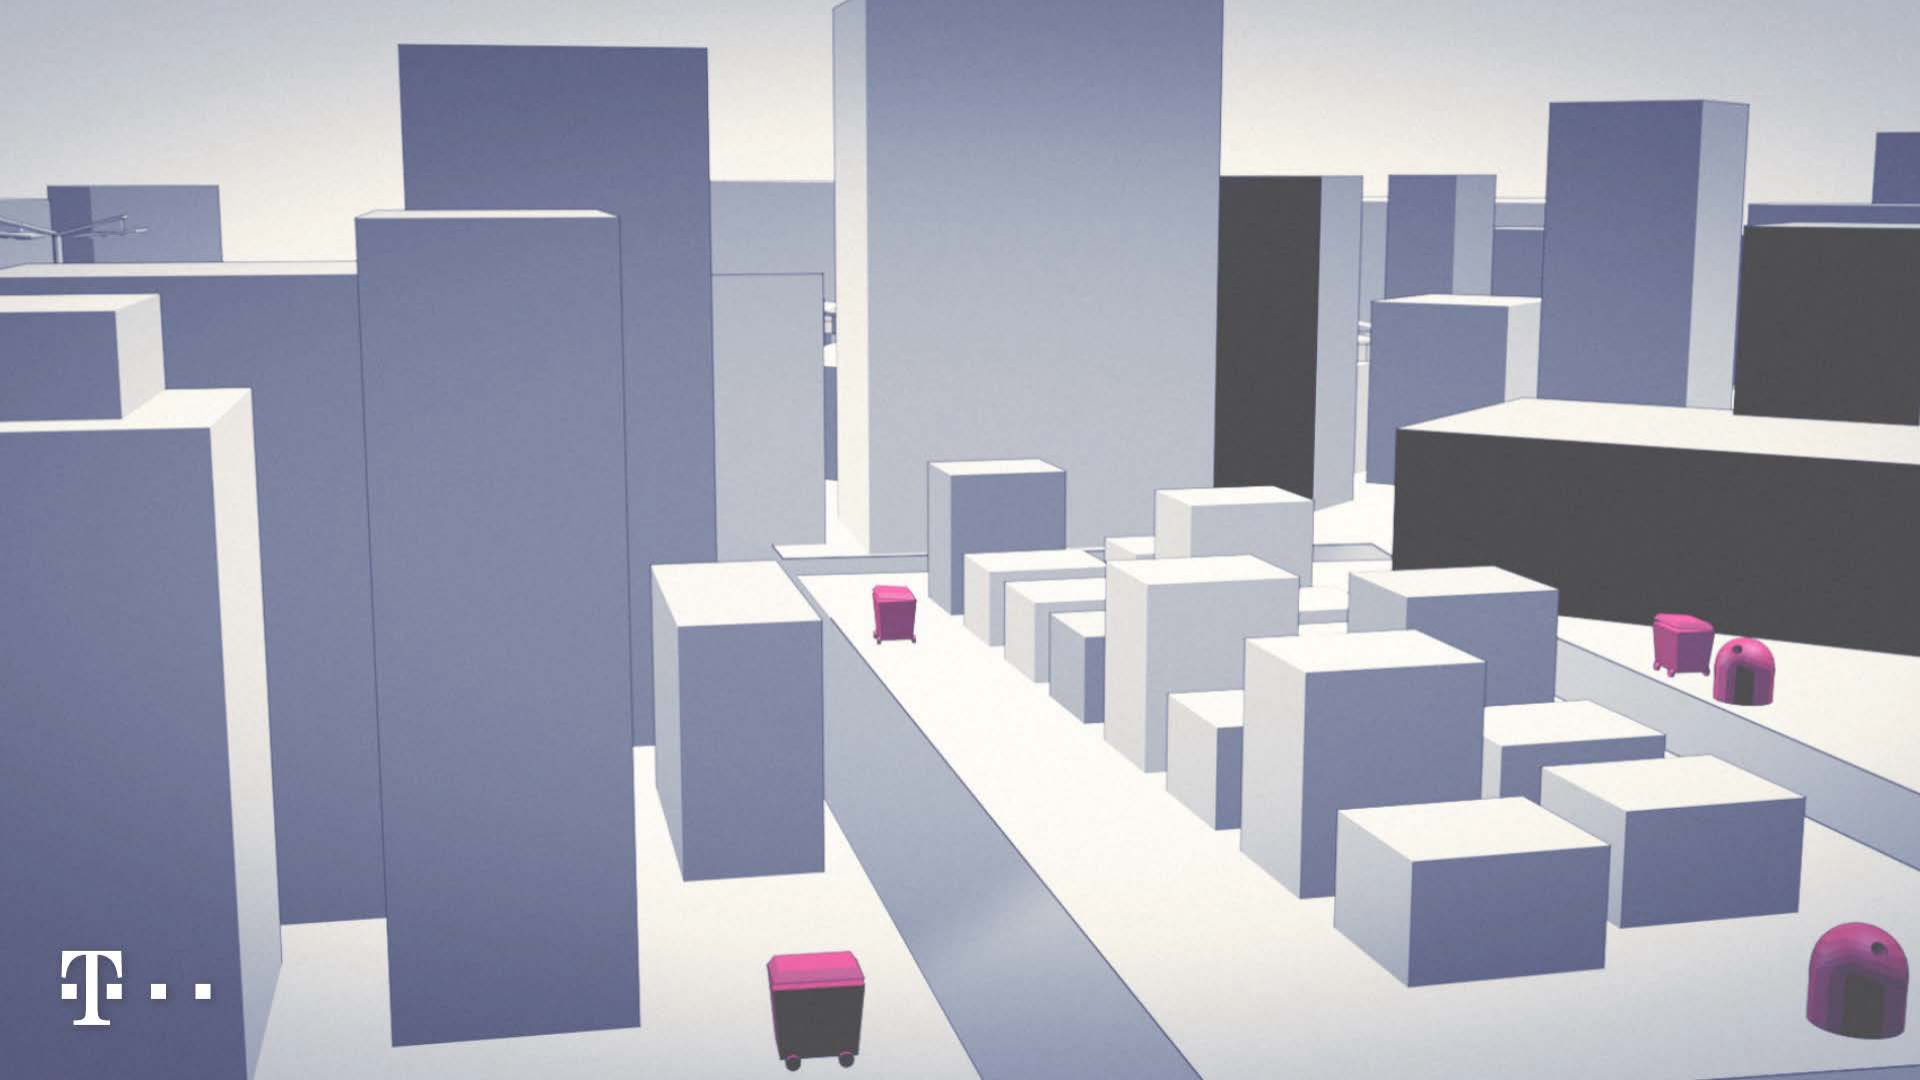

T...

CITY SAFETY

Monitoring of all the
activities and behaviour
through a system of
surveillance cameras

T...

WASTE MANAGEMENT

Remote fill level measuring
of waste containers and
logistic optimization

T...

T...

T...

SMART CITY PLATFORM

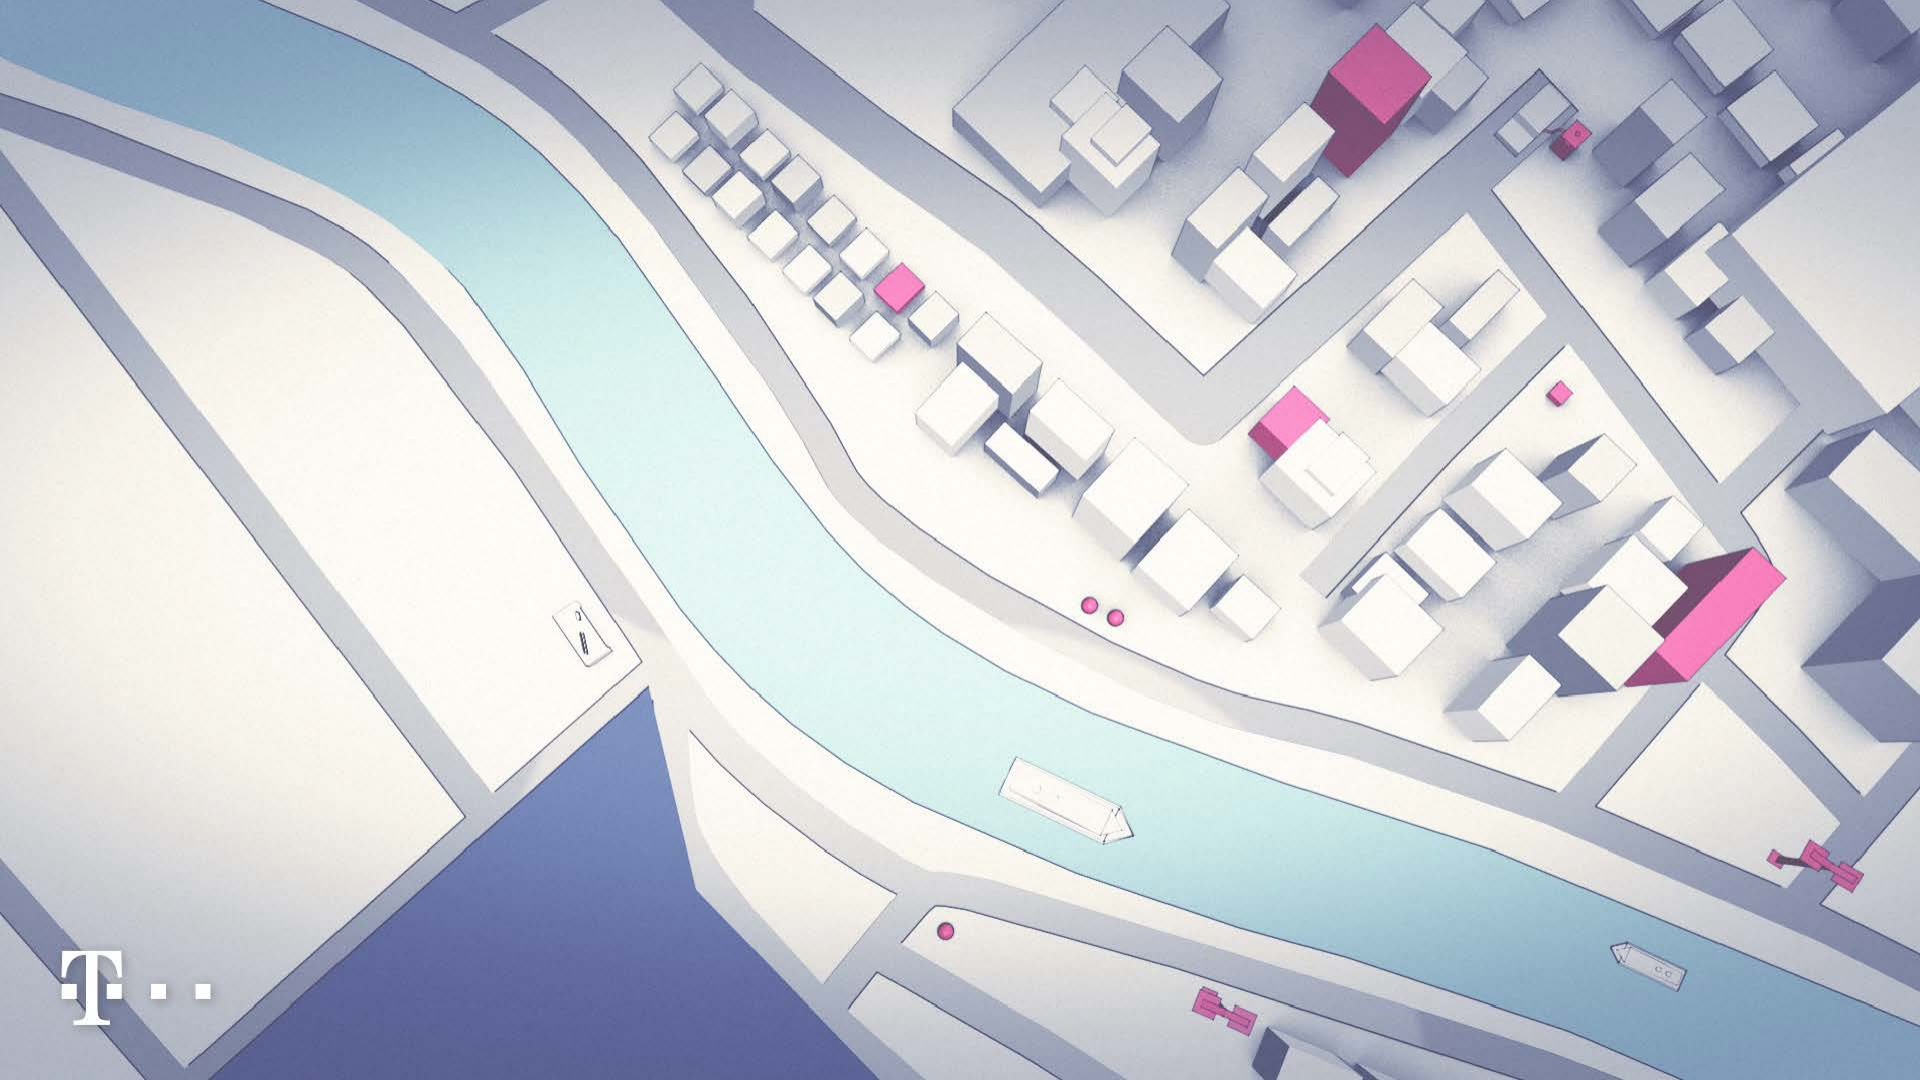

Central platform monitoring
the data from all the Smart
City connected devices

T...

T...

T...

NARROW BAND IoT

Narrowband radio
technology designed for
the Internet of Things
